Drawings

2. The drawings filed on 6-6-2002 are acceptable subject to correction of the following informalities. The Examiner notes that the current drawings in the IFW are of poor image quality and better copies of these drawings are required.

Examiner's Reasons for Allowance

3. The following is an examiner's statement of reasons for allowance:
 - 3.1 As regards independent claim 31, the following limitations in combination with other limitations are neither anticipated nor made obvious by the prior art, "*storing a set of operating environment variables defining a first operating environment from a first machine on the removable media*" in combination with, "*modifying a second operating environment of the second machine based on the stored operating environmental variables so the modified operating environment of the second machine emulates the first operating environment of the first machine independent of the operation of the first machine*" and in further combination with, "*restoring the second operating environment of the second machine upon termination of the emulation*". The Examiner notes that the expressly claimed limitation of restoring the operating environment of the second machine, after termination of the emulation is neither, by using a removable media is neither disclosed nor made obvious by the prior art.
